INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/US03/20596

I. Basis of the report						
1.	1. With regard to the elements of the international application:*					
İ	the international application as originally filed.					
	冈	the description:				
}		pages 1-5, 7-10, 12-13 and 15-23 as originally filed				
1		pages o, 11 and 14 , filed with the demand				
İ		pages NONE, filed with the letter of				
	\boxtimes	the claims:				
ĺ		pages 1-4 , as originally filed				
		pages NONE, as amended (together with any statement) under Article 19 pages 5-10, filed with the demand				
		pages NONE, filed with the letter of				
	\boxtimes	the drawings:				
		pages 1-5, as originally filed				
		pages NONE filed with the demand				
		pages NONE , filed with the letter of				
	Ш	the sequence listing part of the description:				
		pages NONE , as originally filed pages NONE , filed with the demand				
		pages NONE, filed with the letter of				
2.	Wit	regard to the language, all the elements marked above were evoluble or function to				
	The property of the filler individual subjects and the property of the state of the					
	I Hes	which is:				
	\vdash	the language of a translation furnished for the purposes of international search (under Rule23.1(b)).				
	\vdash	the language of publication of the international application (under Rule 48.3(b)).				
	Ш	the language of the translation furnished for the purposes of international preliminary examination(under Rules 55.2 and/or 55.3).				
3.	3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the					
	international preliminary examination was carried out on the basis of the sequence listing:					
	contained in the international application in printed form.					
		filed together with the international application in computer readable form.				
	\square	furnished subsequently to this Authority in written form.				
furnished subsequently to this Authority in computer readable form.						
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the				
		international application as filed has been furnished.				
	Ш	The statement that the information recorded in computer readable form is identical to the written sequence listing				
	<u> </u>	Mas Seen rarmanet.				
4.	\boxtimes	The amendments have resulted in the cancellation of:				
		the description, pages NONE				
		the claims, Nos. NONE				
		the drawings, sheets/fig NONE				
5.						
		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**				
* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17). ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

Form PCT/IPEA/409 (Box I) (July 1998)

International application No. PCT/US03/20596

 Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement 					
1. STATEMENT					
Novelty (N)	Claims 1-68	YES			
	Claims NONE	NO			
Inventive Step (IS)	Claims 1-68 Claims NONE	YES NO			
Industrial Applicability (IA)					
industrial repplicability (IA)	Claims 1-68 Claims NONE	YESNO			
Claims 1-68 meet the criteria set out in PCT Article 33(2)-(3). because the combination of KOU (U.S. 5,978,923) and MOORE et al. (U.S. 6,237,101) does not teach or fairly suggest a method for a computing device to discover mobility context and response to said mobility context, the method comprising: -receiving a job and the trigger condition of said job, wherein said trigger condition define a trigger state in said mobility context; -storing said trigger state in memory of a mobility context receiving device (MLRD), wherein said MCRD is capable of receiving current state of said mobility context; -receiving current state of said mobility context; -checking said current state is subset of said trigger state; and -executing said job by said application on a host system after receiving said signal.
